PROFESSIONAL PROFILE

Computing graduate with practical experience in full-stack software development and machine learning. Skilled in developing web applications using React, building backend services with FastAPI and Django, and working with relational databases. Experienced in integrating AI-powered APIs, developing machine-learning models and deploying web applications. Interested in advancing knowledge in Artificial Intelligence and developing intelligent software solutions to address real-world problems.

FEATURED PROJECTS

1. Lung Cancer Prediction System

Technologies: Python, Scikit-learn, FastAPI, React.js, Vercel, Render

- Developed a machine-learning application to predict pulmonary disease using 17 health and lifestyle features.
- Trained and evaluated multiple classification models, including Logistic Regression, Decision Tree and Random Forest.
- Achieved a reported accuracy of 91.6% with the Random Forest model.
- Developed a FastAPI backend to serve model predictions and connected it with a React frontend.
- Deployed the frontend and backend using Vercel and Render.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, PHP, C#, SQL

Machine Learning & Data Science: Scikit-learn, Pandas, NumPy, Classification Models

Backend Development: FastAPI, Django, ASP.NET Core, RESTful APIs

Frontend Development: React.js, Vite, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MySQL, SQLite

Tools & Platforms: Git, GitHub, Google Colab, Swagger, Vercel, Render

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

Everest Technologies

- Contributed to the development of a trekking and tourism web application using React.js and Vite.
- Developed responsive and interactive frontend interfaces.
- Integrated frontend components with backend APIs.
- Collaborated on development tasks and used Git for version control and project collaboration.
